Professional Summary

Business Analyst with 6+ years of experience bridging business needs and technology solutions within global banking and operational environments. Skilled in requirement elicitation, stakeholder collaboration, and translating complex operational challenges into structured functional solutions that improve efficiency, data quality, and decision-making.

Experienced in Agile delivery environments, supporting sprint planning, validating business requirements, coordinating UAT, and working closely with engineering, analytics, and operations teams to deliver scalable process improvements.

Core Competencies

Business Analysis:	Requirement Gathering, BRD/SRS Preparation, Functional Specifications, User Stories, Acceptance Criteria
Stakeholder Management:	Workshops, Requirement Validation, Cross-Functional Coordination, UAT Support
Process Improvement:	Workflow Optimization, Root Cause Analysis, Operational Efficiency Initiatives
Tools & Analytics:	SQL, Python, Tableau, Alteryx, Data360, Excel
Methodologies:	Agile, Scrum Collaboration, SDLC, Business Process Mapping

Professional Experience

HSBC

Jan 2025 – Present

SME Manager – Business & Data Analytics

- Engage with Operations, Risk, and Technology stakeholders to gather, analyse, and document business requirements for process improvements and analytics solutions.
- Translate business needs into functional workflows, defining logic, validation rules, and expected outcomes for development teams.
- Facilitate discussions between business users and engineering teams to ensure shared understanding of requirements and delivery goals.
- Support Agile delivery by contributing to sprint planning, backlog refinement, and requirement clarification.
- Conduct validation sessions with stakeholders to ensure delivered solutions meet business expectations.
- Drive process optimization initiatives that improved operational turnaround time and reduced manual intervention.

HSBC

Jun 2022 – Jan 2025

Senior Data Analyst – Market Operations

- Worked closely with business teams to analyse operational challenges and define functional solutions to improve reporting and exception handling.
- Prepared detailed requirement documentation and collaborated with development teams during implementation phases.
- Supported testing activities by reviewing scenarios, validating outputs, and coordinating with users during UAT cycles.
- Developed dashboards and analytical reports enabling stakeholders to make informed business decisions.

- Identified opportunities for workflow improvements and implemented automation initiatives aligned with business goals.

Wipro Technologies

Jun 2019 – Jun 2022

Senior Software Engineer

- Collaborated with business stakeholders to understand system requirements and translate them into technical deliverables.
- Participated in SDLC phases including requirement clarification, development coordination, testing, and deployment support.
- Worked across multiple teams in a matrix environment ensuring alignment between functional expectations and system capabilities.

Key Projects

Operational Workflow Optimization Initiative

- Analysed business processes related to exception handling and designed improved workflows, reducing investigation time by 35%.

Operational Monitoring Dashboard

- Gathered stakeholder requirements and delivered dashboards providing real-time visibility into operational performance metrics.

Education

Ph.D. (Pursuing) – Computer Science, Annamalai University	2025 – Present
M.Tech – Computer Science, BITS Pilani	2024
B.E. – Computer Science, United Institute of Technology	2019

Certifications

Machine Learning Advanced Certification

Data Science with Python & R

Tableau Certification
